Ballast Product Guide • • • • • • • • • • •

Welcome to our Ballast Products Catalog. We have updated our ballast offerings to better meet the needs of our customers. Our Electronic Ballast section has been completely revised to include more multi-volt, small case, and micro-can options. And, because Howard Lighting is committed to promoting environmentally friendly products, we've added the high-efficiency multi-volt line of ballasts to our product offerings.

Legislation has impacted some of our current ballast offerings. Because we support the transition to environmentally friendly ballasts, our HID Pulse Start family is in full compliance with the Energy Independence and Security Act of 2007 (EISA2007) efficiency standards. Howard Lighting will continue to sell magnetic fluorescent ballasts impacted by EPACT2005 through the scheduled cutoff date of 2010, along with magnetic ballasts that are unaffected by this legislation.

While our product offerings have expanded considerably within the last few years, our commitment to provide product literature that is user-friendly remains the same. We sort our ballast information by lamp type to help you quickly find the ballast product that best suits your individual needs.

Our ballast product lines include electronic fluorescent, magnetic fluorescent, electronic compact fluorescent, high intensity discharge, and sign ballasts. Each ballast section provides you with a product image in its overview section, as well as specifications, ordering/specification data, wiring diagrams, and case dimensions. You will also find specific product information within each section. For example, you will find lead length information in the electronic and magnetic fluorescent sections, and capacitor, starter, and bracket information in the HID ballast section. Our goal was to create an informational piece of literature to enhance product knowledge, and assist our customers in selecting the very best lighting solutions for their projects. We hope you feel that we have succeeded.

In addition to our ballast product line, Howard Lighting features a full line of lamp and fixture offerings. Contact a Howard sales representative or a member of our support staff with questions or comments.

Howard Corporate Headquarters

Howard Industries' corporate headquarters and computer and medical cart manufacturing facilities are nestled within the 504-acre Howard Technology Park.

Building highlights:

- 60,000 sq ft of office space
- 72,000 sq ft of manufacturing space
- 3,200 sq ft bridge way connecting offices to manufacturing facility

Power Solutions

Howard Power Solutions, originally known as Howard Industries, was founded in 1968 by Billy W. Howard, Sr. Over the past four decades, this company has grown to be the nation's leading manufacturer of distribution transformers, with over 7 million transformers in service throughout the United States and abroad. Located in Laurel, MS, this facility has 2 million square feet, making it the largest transformer plant in the world. Our newest transformer division, Howard Substation Transformers, located near corporate headquarters, began manufacturing operations in April 2005 producing power transformers with higher KVA and voltage ratings.

Technology Solutions

Our new Corporate Headquarters is also home to our technology division, Howard Technology Solutions, and its medical division, Howard Medical. These 2 divisions bring to market cutting-edge, high-quality technology and medical equipment. Whether selling Howard-manufactured products such as desktops, notebooks, servers, and medical carts or partnering with other industry-leading companies to provide over 190,000 products, one can be sure when you buy from Howard, the needed equipment is available at affordable prices.

Lighting Products

Howard Lighting Products markets a vast portfolio including electronic and magnetic fluorescent ballasts, magnetic HID ballasts, as well as fluorescent lamps, T5/T8 fluorescent lamps, and halogen lamps. This division continually updates their product lines to meet the ever-changing demands of the market. They currently have products in use at Johnson Space Center, Kennedy Space Center, Camp Pendleton, CIA Headquarters, Fort Bragg, and numerous other U.S. government installations, as well as many, many private facilities.

Transportation

Howard Transportation, a wholly-owned subsidiary of Howard Industries, Inc., operates a full-load, long-haul, flat-bed common carrier truck line and brokerage firm that transports commodities and industrial goods throughout the continental United States. Initially started to transport Howard Power Solutions' raw materials and finished products, this division today consists of over 200 trucks with regional terminal facilities also located in West Virginia and North Carolina.

Identifying the fluorescent model number • • • • • • •

To simplify the identification of Howard ballasts for specifying, ordering or stocking, every item has been assigned an easy-to-use, easy-to-understand model number.

Each individual digit represents a specific characteristic of the ballast. Each alpha/numeric model number provides a complete description of each ballast.

E P2/32IS/MV/MC/HE	ELECTRONIC BALLAST
EPL 2/32IS/MV/MC/HE	LOW POWER
EPH 3/32IS/MV/MC/HE	HIGH POWER
EP2 /32IS/MV/MC/HE	PRECISION POWER < 10% THD
EP3 /32IS/MV/MC/HE	NUMBER OF LAMPS SUPPORTED BY THE BALLAST
EP3/32 IS/MV/MC/HE	PRIMARY LAMP DESIGN
EP3/32IS /MV/MC/HE	INSTANT START, PARALLEL CIRCUIT
EP2/32PRS /MV/MC/HE	PROGRAM RAPID START
E2/40RS -120MC	RAPID START
EP2/32IS/MV /MC/HE	INPUT LINE VOLTAGE (MULTI-VOLT STANDARD 120-277V)
EP2/32IS/MV/MC	MICRO-CASE
EP2/75IS/MV/SC	SMALL-CASE
EP2/32IS/MV/MC/HE	HIGH EFFICIENCY BALLAST

Specifications

Instant Start

- Ballast shall have a five-year warranty
 - Ballast shall be UL certified
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-1991
 - Ballast shall comply with the limits of FCC Part 18C Class A
 - Ballast shall have a lamp operating frequency greater than 40KHz
 - Ballast shall have a 0 F minimum lamp starting temperature for primary lamp
 - Ballast shall be Instant Start
 - Ballast shall be Parallel Lamp Operation
 - Ballast shall have a minimum Power Factor of 98% for primary lamp operation
 - Ballast shall operate within a +/- 10% of the ballast specified line voltage at an input frequency of 50Hz or 60Hz
 - Ballast shall have a maximum case hot spot temperature of 90°C

Rapid Start

- Ballast shall have a five year warranty
 - Ballast shall be UL certified
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-1991
 - Ballast shall comply with the limits of FCC Part 18C Class A
 - Ballast shall have a lamp operating frequency greater than 20kHz
 - Ballast shall have a 32° F/ 0° C minimum lamp starting temperature for primary lamp
 - Ballast shall be potted
 - Ballast shall be Rapid Start
 - Ballast shall be Series Lamp Operation
 - Ballast shall have minimum Power Factor of 98% for primary lamp operation
 - Ballast shall operate within +/- 10% of the ballast specified line voltage at 60Hz
 - Ballast shall have a maximum case hot spot temperature of 90°C

T5 Program Rapid Start

- Ballast with a maximum case temperature of 90°C shall have a three-year warranty
 - Ballast with a maximum case temperature of 70°C shall have a five-year warranty
 - Ballast shall be UL listed
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-1991
 - Ballast shall comply with the limits of FCC Part 18C Class A
 - Ballast shall have a lamp operating frequency of 40kHz
 - Ballast shall have a 0° F minimum lamp starting temperature for primary lamp
 - Ballast shall be Program Rapid Start
 - Ballast shall be Series Lamp Operation
 - Ballast shall have end-of-life protection
 - Ballast shall have a 0°F minimum starting temperature
 - Ballast shall have minimum Power Factor of 98% for primary lamp operation
 - Ballast shall operate within +/- 10% of the ballast specified line voltage at 60Hz
 - Ballast shall operate at a maximum case hot spot temperature of 90°C

Rapid Start – Residential Rated

- Ballast shall have a five year warranty
 - Ballast shall be UL certified
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-1991
 - Ballast shall comply with the limits of FCC Part 18C Class B (residential)
 - Ballast shall have a lamp operating frequency greater than 40KHz
 - Ballast shall have a 0 F minimum lamp starting temperature for primary lamp
 - Ballast shall be Instant Start
 - Ballast shall be Parallel Lamp Operation
 - Ballast shall have a minimum Power Factor of 98% for primary lamp operation
 - Ballast shall operate within a +/- 10% of the ballast specified line voltage at an input frequency of 60Hz
 - Ballast shall have a maximum case hot spot temperature of 90 C

Instant Start CFL/ Long Twin Tube

- Ballast shall have a five-year warranty
 - Ballast shall be UL listed
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-1991
 - Ballast shall comply with the limits of FCC Part 18C Class A
 - Ballast shall have a lamp operating frequency greater than 20kHz
 - Ballast shall have a 0° F minimum lamp starting temperature for primary lamp
 - Ballast shall be potted
 - Ballast shall be Rapid Start
 - Ballast shall be Series Lamp Operation
 - Ballast shall have minimum Power Factor of 99% for primary lamp operation
 - Ballast shall operate within +/- 10% of the ballast specified line voltage at 60Hz
 - Ballast shall have a maximum case hot spot temperature of 90° C

T8 Program Rapid Start

- Ballast shall have a five year warranty
 - Ballast shall be UL listed
 - Ballast shall be sound rated Class A
 - Ballast shall be Class P Type 1 Outdoor
 - Ballast shall have a Lamp Current Crest Factor of <1.7
 - Ballast shall withstand line transients as specified in ANSI C62.41-2002
 - Ballast shall comply with the limits of FCC Part 18C Class A
 - Ballast shall have a lamp operating frequency of 40kHz
 - Ballast shall have a 0° F minimum lamp starting temperature for primary lamp
 - Ballast shall be Program Start
 - Ballast shall be Series Lamp Operation
 - Ballast shall have minimum Power Factor of 98% for primary lamp operation
 - Ballast shall operate within +/- 10% of the ballast specified line voltage at 60Hz
 - Ballast shall operate at a maximum case hot spot temperature of 90°C

Identifying the Ballast Model Number

To simplify the identification of Howard ballasts for specifying, ordering or stocking, every item has been assigned easy-to-use, easy-to-understand model number. Each individual digit represents a specific characteristic of the ballast. Each alpha/numeric model number provides a complete description of each ballast.

M2/40RS-120	MAGNETIC BALLAST
M2/40RS-120	NUMBER OF LAMPS SUPPORTED BY THE BALLAST
M2/40RS-120	PRIMARY LAMP DESIGN
M2/40RS-120	RAPID START
M2/75IS-120	INSTANT START
M1/13CFN-120	COMPACT FLUORESCENT NORMAL POWER
M2/40RS-120	INPUT LINE VOLTAGE

Specifications

- Ballast shall have a three-year limited warranty
- Ballast shall be UL certified
- Ballast shall be Class P Type 1 Outdoor
- Ballast shall have a Lamp Current Crest Factor of <1.7
- Ballast shall withstand line transients as specified in ANSI C62.41-1991
- Ballast shall have a minimum Power Factor of 90% for primary lamp operation
- Ballast shall operate within a +/- 10% of the ballast specified line voltage at an input frequency of 60Hz
- Ballast shall have a maximum case hot spot temperature of 90°C

Energy Policy Act Update: Fluorescent Ballast Efficiency Baseline Increases • • • • • • •

The Department of Energy finalized a rule regarding the manufacture and sale of fluorescent lamp ballasts that will result in significant energy savings and emissions reductions. The commercial and industrial lighting sector will be subject to new energy-efficient lighting regulations beginning April 1, 2005. Under these new regulations ballast manufacturers can no longer produce ballasts for installation into new lighting fixtures unless they meet the new minimum Ballast Efficacy requirements (BEF's).

These regulations affect ballast that operates T12 fluorescent lamps. The new regulation has a different effective date for new fixtures versus replacing existing ballast in the field or replacement ballasts. With existing technology today, only electronic ballasts comply with these not DOE guidelines. The following is a summary of this new regulation and the products and markets affected.

Ballast Regulations

T12 magnetic ballast for replacement purposes in existing installations can be manufactured until June 30, 2010, but must meet the following requirements:

- Be labeled "for Replacement Use Only"
- Have leads shorter than the length of lamps intended to be operated
- Be shipped in packages no exceeding 10 ballasts
- Meet existing T12 magnetic BEF criteria

Exemptions include:

- T12 diming ballasts that dim to 50% or less
- Two lamp F96T12HO ballast designed for -20F operation and used in an outdoor sign
- Magnetic ballasts with power factors less than 0.90 designed and labeled for residential building applications

The lamps covered and BEF numbers are as follows:

Application	Ballast Input Voltage	Ballast Efficacy Factor
One F40T12 lamp	120 or 277	2.29
Two F40T12 lamps	120 or 277	1.17
Two F96T12 lamps	120 or 277	0.63
Two F96T12HO lamps	120 or 277	0.39

Minimum requirements have not been set for T8 lamps, since there are a few applications where electronic ballast would not be used and the low frequency magnetic ballasts would be necessary.

Important Effective Dates

July 1, 2005 ballast manufacturers can no longer sell ballasts for use in new fixtures that do not meet the BEF requirements. Replacement ballasts marked "For Replacement Use Only" are to be provided until the final implementation date.

April 1, 2006 lighting fixtures manufacturers can no longer incorporate ballast that do not meet the new BEF requirements in new fixtures

July 1, 2010 ballasts, including replacements, can no longer be manufactured unless they meet the new BEF Guidelines.

If you have questions about what Howard Lighting Products is doing to ensure our products meet or exceed these government regulations, contact our customer support department at 800.956.3456 between 8:00am – 5:00pm CST or by e-mail at lighting@howard-ind.com.

Specifications • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • •

- Ballast shall have a five-year warranty with maximum case temperature of 70°C or three-year warranty with maximum case temperature of 90°C.
- Ballast shall be UL certified.
- Ballast shall be sound rated Class A.
- Ballast shall be Class P Type 1 Outdoor.
- Ballast shall have a Lamp Current Crest Factor of <1.7.
- Ballast shall withstand line transients as specified in ANSI C62.41.
- Ballast shall comply with the limits of FCC Part 18C Class B (Consumer).
- Ballast shall have a lamp operating frequency greater than 40KHz.
- Ballast shall have color-coded, dual entry poke-in connectors.
- Ballast shall ignite lamps within 900ms.
- Ballast shall have a 0°F minimum lamp starting temperature for primary lamp(s).
- Ballast shall be Program Start.
- Ballast shall be Series Lamp Operation.
- Ballast shall have a minimum Power Factor of 97% for primary lamp operation.
- Ballast shall operate within a +/- 10% of the ballast specified line voltage at an input frequency of 50Hz or 60Hz.
- Ballast shall have a maximum case hot spot temperature of 90°C.
- Ballast shall have end of lamp life protection.
- Ballast shall have auto restart.

Identifying the Ballast Model Number • • • • • • • • • • • •

HID Ballast Model Number example: Metal Halide (M), 400 watt (0400), 120/208/240/277 line voltage (71), *core and coil (C), CWA circuit (2), 60 line frequency/1lamp (1), standard design (1), replacement kit (K).

M 0 4 0 0 – 7 1 C – 2 1 1 – K

LAMP CODE
Column 1: Selects the proper lamp type. M = Metal Halide/Pulse Start MH S = High Pressure Sodium MS = Metal Halide/High Pressure Sodium

LAMP WATTAGE
Column 2 3 4 5: Selects the proper lamp wattages. 0035 = 35 Watt 0050 = 50 Watt 0070 = 70 Watt 0100 = 100 Watt 0150 = 150 Watt 0175 = 175 Watt 0200 = 200 Watt 0250 = 250 Watt 0320 = 320 Watt 0350 = 350 Watt 0400 = 400 Watt 0750 = 750 Watt 0875 = 875 Watt 1000 = 1000 Watt 1500 = 1500 Watt

LINE VOLTAGE
Column 6 7: Selects the proper input operating voltages.

120	0 2
277	0 8
480	1 1
120/277	2 3
120T/480	2 9
120/277/347	5 9
120/208/240/277	7 1
120/208/240/277/480	8 1

CASE TYPE
Column 8: Indicates the type of case used. Case Construction Type. Core and Coil Utility - Tabbed

CIRCUIT TYPE
Column 9: Indicates the type of circuit used. Design Type R-HPF - Reactor 1 CWA - Constant Wattage Auto Transformer 2 HX-HPF - High Reactance-High Power Factor 5 PS-CWA - Pulse Start Constant Wattage Autotransformer 6 Multiple Lamp Reactor 8 Multiple Lamp CWA 9

LINE FREQUENCY AND NUMBER OF LAMPS		
Frequency	No. of Lamps	Insulation Class
60	1	H (180) 1
60	1	N (200) 2
60	1	H (180) E

* E = EISA 2007 Compliant (Circle E)

DESIGN UPDATES
Column 11: Indicates design revisions that are deemed significant enough for a model number change.
Column 12: Accessory codes are used to specify components included in the ballast order. This code is not part of the model number included on the label, but will be used as an extension to identify accessories.

CORE AND COIL ONLY	NO SUFFIX
Ballast with welded bracket	B
Ballast with oil cap	C
Ballast with dry cap	D
Ballast with standard starter	E
Ballast replacement kit	K
Ballast with lamp replacement kit	L
Pre-wired ballast replacement kit	P

*Disclaimer: All possible ballast product numbers might not be available. Please consult factory before ordering.

Specifications

Performance:

- Ballast shall be designed in accordance with all applicable ANSI specifications including ANSI C82.4.
- Ballast shall be designed with Class "H" (180°C) or higher insulation system.
- Ballasts shall be designed to operate for 60,000 hours of continuous operation at their maximum rated temperature.
- Ballast and starter combinations shall operate reliably at starting temperatures of -40°C for High Pressure Sodium ballasts and -30°C for Metal Halide ballasts at nominal line voltage of plus or minus 10%.
- All HID ballast shall have a nominal ballast factor of 1.0.

Regulatory:

- Manufacturer shall provide written warranty against defects in material or workmanship for 2-Years from date of manufacture.
- Manufacturer shall have been manufacturing HID ballasts for at least ten years.
- All HID ballasts shall be UL component recognized.
- Ballast must be Howard Lighting Products (or approved equal).

Capacitors & Starters for HID

Capacitors:

- All capacitors provided shall have a self-contained internal bleeder resistor where required according to UL1029.
- All oil-filled capacitors shall be housed in alumi-

num or corrosion-resistant steel cans and contain .25" quick disconnect terminals.

- Oil filled capacitors shall have a 90°C max. case temperature rating.
- Dry film acitors shall have a 100°C max. case temperature rating cap.

Starters:

- All starters will be epoxy-filled with a plastic external housing or aluminum external housing.
- All starters shall be designed to provide six months of open circuit operation without failure.
- All starters shall have a case rating temperature of 105°C.
- All starters shall be designed to withstand 10,000 hours of continuous pulsing.
- All starters shall have no exposed live parts.

HID Kits:

- All HID kits shall be precision wound to insure proper insulation.
- HID core and coil shall be interchangeable with prior ballast or include mounting bracket to adapt ballast to intended fixture.
- All HID kits shall be supplied with pre-insulated input voltage leads.
- There are to be no exposed live parts on the core & coil, starter, or dry capacitor.
- Must meet all ANSI Specifications for the specified lamp.
- Kit must include installation instructions and 1-800# for field assistance.
- Ballast must be Howard Lighting Product (or approved equal).

NEW ENERGY POLICY

Metal Halide Legislation (EISA) Energy Independence & Security Act of 2007

Implementation Date: January 1, 2009

Products Affected: All metal halide fixtures (indoor or outdoor) from 150 to 500 watts. Products not compliant can no longer be manufactured after December 31, 2008.

Inventory: Replacement lamps and ballast for probe start (standard metal halide) will remain available and are not affected by the legislation. Remaining probe start fixture inventory may be sold after January 1, 2009, provided it was manufactured prior to January 1, 2009.

Purpose/Intent: Shift the US to energy independence and utilization of higher efficiency lighting products.

Luminaire Exemptions:

Standards do not apply to fixtures that:

- Use electronic ballast rated for 480 volts
- Use regulated lag ballast
- Fixtures that meet all of the following criteria (within a single fixture):
 1. Contain a ballast rated to operate at an ambient air temperature above 50° C as specified by UL 1029-2001
 2. Rated for wet location use as defined by National Electrical Code 2002 Section 410.4(A)
 3. Are only rated for 150W lamps

Federal Trade Commission (FTC)

Label Identification:

- Circle E logo is required on ballast contained in the fixture, product packaging, all advertising and marketing materials (merchandising, catalogs, website content, point of purchase, etc.)*.
- Affected products (150W - 500W) manufactured on or after January 1, 2009, require the identification mark.

Probe Start (watts)	ANSI	Lamp Size	Mean Lumens	Pulse Start Watts	ANSI	Lamp Size	Mean Lumens
150	M107/E	Medium	8500	150	M102/E	Medium	10000
175	M57/E	Medium Mogul	9300	175	M152/E M137/E	Mogul	12800
				200	M136/E	Mogul	13500
250	M58/E	Mogul	17000	250	M153/E M138/E	Mogul	19000
				320	M154/E M132/E	Mogul	21000
				350	M131/E	Mogul	27000
400	M59/E	Mogul	23500	400	M155/E M135/E	Mogul	31000

EISA Minimum Ballast Efficiency:

Ballast Type	Minimum Ballast Efficiency Rating	Fixture Wattage
Magnetic Probe Start	94%	150W - 250W
Magnetic or Electronic Pulse Start	88%	
Electronic (non-Pulse Start)	90% 92%	251W - 500W

(E) Compliant Efficiency Calculation (examples):

Fixture Wattage	Minimum Efficiency	Input Watt Calculation (maximum fixture input watts)
250 Watt Probe Start	94%	250/.94 = 266
250 Watt Pulse Start	88%	250/.88 = 284
250 Watt Electronic Pulse Start	90%	250/.90 = 278

Benefits of Pulse Start Metal Halide vs Probe Start :

- Faster restrike time (3-4 minutes)
- Half the warm up time (2 minutes)
- 25% to 50% improved lumen output (efficacy)
- Improved illumination levels over life (better lumen maintenance)
- Colder starting temperatures

HID Ballast Wiring Connections • • • • • • • • • • • • • • • • •

A

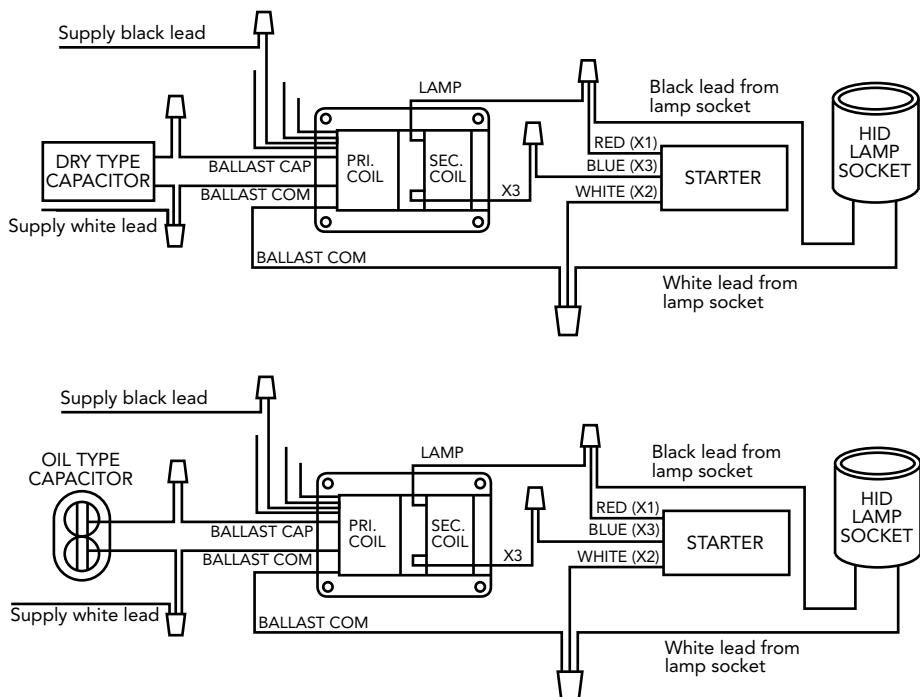

TYPICAL REACTOR WIRING CONNECTIONS

(for HI reactor ballasts with model number -1xx or -7xx suffix, such as S0150-02C-111 or M0400-08C-711)

1. Field wiring connections should only be made by qualified personnel.
2. Turn off supply voltage at breaker before accessing fixture Wiring Compartment.
3. Refer to wiring diagram on ballast label for proper component connections (typical connections illustrated above).
4. For safe operation:
 - a) Ground all system components (metallic case capacitor, ballast core, fixture housing, etc)
 - b) Insure all unused leads are individually insulated from ground
 - c) Wire product in accordance with local and national electric codes
 - d) Never perform maintenance while fixture is energized
5. Reassemble fixture Wiring Compartment after completing wiring connections.
6. Turn on supply voltage at breaker.

HID Ballast Wiring Connections • • • • • • • • • • • • • • •

B

TYPICAL HX (High Reactance) BALLAST CONNECTIONS
(for HI HX-ballasts with model number -5xx suffix, such as M0100-71C-511)

1. Field wiring connections should only be made by qualified personnel.
2. Turn off supply voltage at breaker before accessing fixture Wiring Compartment.
3. Refer to wiring diagram on ballast label for proper component connections (typical connections illustrated above).
4. For safe operation:
 - a) Ground all system components (metallic case capacitor, ballast core, fixture housing, etc)
 - b) Insure all unused leads are individually insulated from ground
 - c) Wire product in accordance with local and national electric codes
 - d) Never perform maintenance while fixture is energized
5. Reassemble fixture Wiring Compartment after completing wiring connections.
6. Turn on supply voltage at breaker.

Specifications

- Magnetic Sign Ballasts are UL Listed, Class P, thermally protected fluorescent sign ballasts for use with T12 High Output.
 - 800mA RS lamps.
 - Ballasts intended for Type 2 Outdoor Non-Weatherproof applications.
 - Ballasts rated for a minimum starting lamp temperature of -20°F (-30°C).
 - 'Max Lamp Length (in.)' refers to the maximum length of any individual lamp used with that ballast.
 - Lead wires not used should be INDIVIDUALLY insulated.
 - To insure proper lamp starting, mount lamps within 1 inch of a grounded metal backing.

Glossary • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • •

AC (Alternating Current)

Current which flows in one direction and then the other, alternately.

Ampères

("Amps.") A measure of electrical current. In incandescent lamps, the current is related to voltage and power as follows: Watts (power) = Volts x Amps (current).

ANSI (American National Standards Institute)

A consensus-based organization which coordinates voluntary standards for the physical, electrical and performance characteristics of lamps, ballasts, luminaires and other lighting and electrical equipment.

ANSI Ballast Type

Ballast type used to operate lamp in accordance with ANSI standard.

Ballast

An auxiliary piece of equipment required to start and to properly control the flow of current to gas discharge light sources such as fluorescent and high intensity discharge (HID) lamps. Typically, magnetic ballasts (also called electromagnetic ballasts) contain copper windings on an iron core while electronic ballasts are smaller and more efficient and contain electronic components.

Ballast Efficacy Factor (BEF)

Defined as ballast factor divided by input watts. The value is used to evaluate various lighting systems based on light output and power input. The BEF can only be used to compare systems operating the same type and quantity of lamps.

Ballast Factor (BF)

This is the percentage of a lamp's rated lumen output that can be expected when operated on a specific, commercially available ballast. Note that the "rated output" is sometimes measured on a reference ballast unlike ones that actually operate the lamp in the field.

For example, a ballast with a ballast factor of 0.93 will result in the lamp's emitting 93% of its rated lumen output. Ballast with a lower BF results in less light output and also generally consumes less power.

Ballast Hum

Sound generated by the vibration of laminations in the iron core of the transformer or inductor present in the ballast.

Ballast Losses

Power or energy dissipated in the ballast as heat and not converted to lamp energy.

Canadian Standards Association (CSA)

An organization that writes standards and tests lighting equipment for performance as well as electrical and fire safety. Canadian provincial laws generally require that all products sold for consumer use in Canada must have CSA or equivalent approval.

Capacitor

Device in ballast that stores electrical energy. Often used for power factor correction and lamp regulation.

Glossary • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • •

Circle E

Designates a ballast meets or exceeds the requirements of Public Law 100-357 establishing standards of efficiency.

Coil

Windings of copper or aluminum wire surrounding the steel core in ballast. Also refers to the entire assembly comprising the inductor or transformer.

Core

Component of electromagnetic ballast that is surrounded by the coil. Core is comprised of steel laminations or solid ferrite material.

Core & Coil Ballast

A ballast that uses a "Core & Coil" assembly to operate fluorescent or HID lamps. Refers to copper windings on a steel core.

Current Type (AC/DC)

Whether the operational voltage is based on Alternating Current or Direct Current.

Efficacy

A measurement of how effective the light source is in converting electrical energy to lumens of visible light. Expressed in lumens-per-watt (LPW) this measure gives more weight to the yellow region of the spectrum and less weight to the blue and red region where the eye is not as sensitive.

Energy Policy Act (EPACT)

Comprehensive energy legislation passed by the U. S. Congress in 1992. The lighting portion includes lamp labeling and minimum energy efficacy (lumens/watt) requirements for many commonly used incandescent and fluorescent lamp types. Federal Canadian legislation sets similar minimum energy efficacy requirements for incandescent reflector lamps and common linear fluorescent lamps.

Energy Independence and Security Act of 2007 (EISA 2007)

In an effort to move the US toward energy independence, Congress passed the Energy Independence and Security Act of 2007. This new legislation requires certain standards for ballast efficiencies. It went into effect beginning January 1, 2009. The legislation mandates all metal halide fixtures between 150 and 500 Watts must contain 1) a pulse start ballast rated at 88% efficiency or better, 2) a metal halide ballast rated at 94% or better, or 3) an electronic nonpulse start ballast rated at 90-92% or better depending on wattage.

Federal Communications Commission (FCC)

The U. S. Federal agency that regulates emissions in the radio frequency portion of the electromagnetic spectrum. Part 18 of the FCC rules specifies electromagnetic interference (EMI) from lighting devices operating at frequencies greater than 9 kilohertz (kHz). Typical electronically-ballasted compact fluorescent lamps operate in the 24 - 100 kHz frequency range.

Flicker

The periodic variation in light level caused by AC operation that can lead to strobe effects.

Glossary • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • •

Frequency

Rate of alternation in an AC current. Expressed in cycles per second or Hertz (Hz).

Harmonic

An integral multiple of the fundamental frequency (60 Hz) that becomes a component of the current.

Harmonic Distortion

Distortion of an AC waveform caused by multiples of the fundamental frequency (harmonics). Odd triplet harmonics (thirds, ninths, etc.) may result in large currents on the neutral line in a fourwire Wye three-phase system.

Hertz (Hz)

Unit used to measure frequency of alternating current or voltage.

High Power Factor

A ballast whose power factor is corrected to 90% or greater.

Ignitor

An electronic device providing a high voltage pulse to initiate an electrical discharge. Typically, the ignitor is paired with or is a part of the ballast (See STARTER).

Input Voltage

Power supply voltage required for proper operation of fluorescent or HID ballast.

Input Watts

The total power input to the ballast which includes lamp watts and ballast losses. The total power input to the fixture is the input watts to the ballast or ballasts and is the value to be used when calculating cost of energy and air conditioning loads.

Instant Start

Lamp starting method in which lamps are started by high voltage input with no preheating of lamp filaments. Some rapid start lamps are designed so that they may be instant started. (See RAPID START).

Kelvin

A unit of temperature starting from absolute zero, parallel to the Celsius (or Centigrade) scale. 0C is 273K.

Kilowatt (kW)

The measure of electrical power equal to 1000 watts.

Kilowatt Hour (kWh)

The standard measure of electrical energy and the typical billing unit used by electrical utilities for electricity use. A 100-watt lamp operated for 10 hours consumes 1000 watt-hours (100×10) or one kilowatt-hour. If the utility charges \$.10/kWh, then the electricity cost for the 10 hours of operation would be 10 cents ($1 \times \$0.10$).

Laminations

Layers of steel, making up the "core" that is surrounded by the coils in a core & coil ballast.

Glossary • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • • •

Metal Cases

Case design used in both magnetic and electronic ballasts. These ballasts are grounded once they are mounted to the fixture. They meet all safety codes, some of which do not allow plastic in open plenum areas.

Normal Power Factor

Ballasts with power factor less than .90 and do not incorporate any means of Power Factor Correction.

Open Circuit Voltage (OCV)

Open Circuit Voltage measured across the socket the lamp screws into, with the ballast powered on. It is dangerous to stick a voltmeter into such a socket without precise knowledge of the ballast because exceedingly high voltages could be present.

Operating Voltage

For electrical discharge lamps, this is the voltage measured across the discharge when the lamp is operating. It is a function of the lamp arc tube characteristics and is largely independent of the ballast.

Power Factor

Measurement of the relationship between the AC source voltage and current. High power factor ballasts require less AC operating current at the same wattage than an equivalent low power factor ballast.

Formula: Power Factor equals Input Watts divided by the product of Line Volts times Line Amps (Volt Amps or VA).

Preheat Circuit

A type of fluorescent lamp-ballast circuit used with the first commercial fluorescent lamp products. A push button or automatic switch is used to preheat the lamp cathodes to a glow state. Starting the lamp can then be accomplished using simple "choke" or reactor ballasts.

Programmed Rapid Start

Lamp starting method which preheats the lamp filaments while not allowing the lamp to ignite and then applies the open circuit voltage (OCV) to start the lamp. The user may experience a half- to one-second delay after turning on the lamps while the pre-heating takes place. This type of starting circuit keeps lamp end blackening to a minimum and improves lamp life performance, especially in applications where the lamps are frequently switched on and off.

Pulse Start

An HID ballast with a high voltage ignitor to start the lamp.

Rapid Start Circuit

A fluorescent lamp-ballast circuit that utilizes continuous cathode heating, while the system is energized, to start and maintain lamp light output at efficient levels. Rapid start ballasts may be either electromagnetic, electronic or of hybrid designs. Full-range fluorescent lamp dimming is only possible with rapid start systems (See INSTANT START).

Rapid Start

Lamp starting method in which lamp filaments are heated while open circuit voltage (OCV) is applied to facilitate lamp ignition.

Ballast Product Guide

Glossary • • • • • • • • • • • • • • • • • • • • • • • • •

Starter

An electronic module or device used to assist in starting a discharge lamp, typically by providing a high-voltage surge (See IGNITOR).

System

A term referring to the lamp and ballast combination, and sometimes to the entire lighting delivery system including the fixture, the optics, the particular layout and the lighting controls.

TCLP Test

The Toxicity Characteristic Leaching Procedure (TCLP) test, specified in the Resource Conservation and Recovery Act (RCRA) of 1990, is used to characterize fluorescent lamp waste as hazardous or nonhazardous waste. The TCLP test measures the ability of the mercury and/or lead in a lamp to leach from a landfill into groundwater.

Total Harmonic Distortion (THD)

A measure of the distortion of the input current on alternating current (AC) power systems caused by higher order harmonics of the fundamental frequency (60Hz in North America). THD is expressed in percent and may refer to individual electrical loads (such as ballast) or a total electrical circuit or system in a building. ANSI C82.77 recommends THD not exceed 32% for individual commercial electronic ballasts, although some electrical utilities may require lower THDs on some systems. Excessive THDs on electrical systems can cause efficiency losses as well as overheating and deterioration of system components.

Underwriters' Laboratories (UL)

A private organization which tests and lists electrical (and other) equipment for electrical and fire safety according to recognized UL and other standards. A UL listing is not an indication of overall performance. Lamps are not UL listed except for compact fluorescent lamp assemblies - those with screw bases and built-in ballasts.

Uniform Product Code (UPC)

The 12 digit code on the saleable unit that is used for scanning at the register.

Volt

A measure of "electrical pressure" between two points. The higher the voltage, the more current will be pushed through a resistor connected across the points. The volt specification of an incandescent lamp is the electrical "pressure" required to drive it at its designed point. The "voltage" of a ballast (e.g. 277 V) refers to the line voltage it must be connected to.

Voltage

A measurement of the electromotive force in an electrical circuit or device expressed in volts. Voltage can be thought of as being analogous to the pressure in a waterline.

Watts

A unit of electrical power. Lamps are rated in watts to indicate the rate at which they consume energy. (See KILOWATT HOUR).

ELECTRONIC FLUORESCENT BALLAST 5 YEAR LIMITED WARRANTY

Howard Industries, Inc. warrants to the purchaser that its electronic fluorescent ballasts will be free from defects in material and workmanship as conditioned herein for a period of five (5) years from date of manufacture. The date of manufacture by Howard Industries, Inc., Ballast Products Division is stamped on the ballast.

During said warranty period, Howard Industries, Inc. agrees and shall be obligated to a limit of refund of the purchase price of the ballast or, at the option of Howard Industries, Inc., replacement of defective ballasts including a \$10.00 provision for installation costs.

This warranty is not applicable and is voided to any product manufactured by Howard Industries, Inc. which is not stored, installed, operated and maintained in accordance with:

- The National Electric Code (NEC)
- The Standards for Safety of Underwriters Laboratories, Inc. (UL)
- The Standards for the American National Standards Institute (ANSI)
- The Specific Instructions Provided by Howard Industries, Inc. for the Installation of the Product(s)
- Accepted industry practices

The warranties set forth herein are in lieu of any and all other warranties expressed or implied including the warranties of merchantability and fitness for a particular purpose. In no case shall Howard Industries, Inc. be obligated or liable for any indirect, consequential, or incidental damages for breach of this or any other warranty, expressed or implied, whatsoever.

Should at any time within the stated five year period from date of manufacture any appearance of defect in material or workmanship appear, purchaser must notify Howard Industries, Inc. by calling 1-800-956-3456 or (601) 422-0033. Written notice may be mailed to Howard Industries, Inc., Ballast Products Division, PO Box 1590, Laurel, MS 39441 or by fax at (601) 422-1652.

As a condition to qualify for refund of original ballast purchase price or replacement under the provisions of this limited warranty, defective ballasts must be available for return to Howard Industries, Inc. at its request for inspection and test analysis. Prior written approval for return must be obtained from the factory.

MAGNETIC FLUORESCENT BALLAST 3 YEAR LIMITED WARRANTY

Howard Industries, Inc. warrants to the purchaser that it's magnetic fluorescent ballasts will be free from defects in material and workmanship as conditioned herein for a period of three (3) years from date of manufacture. The date of manufacture by Howard Industries, Inc., Ballast Products Division is stamped on the ballast.

During said warranty period, Howard Industries, Inc. agrees and shall be obligated to a limit of refund of the purchase price of the ballast or, at the option of Howard Industries, Inc., replacement of defective ballasts.

This warranty is not applicable and is voided to any product manufactured by Howard Industries, Inc. which is not stored, installed, operated and maintained in accordance with:

- The National Electric Code (NEC)
- The Standards for Safety of Underwriters Laboratories, Inc. (UL)
- The Standards for the American National Standards Institute (ANSI)
- The Specific Instructions Provided by Howard Industries, Inc. for the Installation of the Product(s)
- Accepted industry practices

The warranties set forth herein are in lieu of any and all other warranties expressed or implied including the warranties of merchantability and fitness for a particular purpose. In no case shall Howard Industries, Inc. be obligated or liable for any indirect, consequential, or incidental damages for breach of this or any other warranty, expressed or implied, whatsoever.

Should at any time within the stated three year period from date of manufacture any appearance of defect in material or workmanship appear, purchaser must notify Howard Industries, Inc. by calling 1-800-956-3456 or (601) 422-0033. Written notice may be mailed to Howard Industries, Inc., Ballast Products Division, PO Box 1590, Laurel, MS 39441 or by fax at (601) 422-1652.

As a condition to qualify for refund of original ballast purchase price or replacement under the provisions of this limited warranty, defective ballasts must be available for return to Howard Industries, Inc. at its request for inspection and test analysis. Prior written approval for return must be obtained from the factory.

MAGNETIC HID BALLAST 2 YEAR LIMITED WARRANTY

Howard Industries, Inc. warrants to the purchaser that it's magnetic HID ballasts will be free from defects in material and workmanship as conditioned herein for a period of two (2) years from date of manufacture. The date of manufacture by Howard Industries, Inc., Ballast Products Division is stamped on the ballast.

During said warranty period, Howard Industries, Inc. agrees and shall be obligated to a limit of refund of the purchase price of the ballast or, at the option of Howard Industries, Inc., replacement of defective ballasts.

This warranty is not applicable and is voided to any product manufactured by Howard Industries, Inc. which is not stored, installed, operated and maintained in accordance with:

- The National Electric Code (NEC)
- The Standards for Safety of Underwriters Laboratories, Inc. (UL)
- The Standards for the American National Standards Institute (ANSI)
- The Specific Instructions Provided by Howard Industries, Inc. for the Installation of the Product(s)
- Accepted industry practices

The warranties set forth herein are in lieu of any and all other warranties expressed or implied including the warranties of merchantability and fitness for a particular purpose. In no case shall Howard Industries, Inc. be obligated or liable for any indirect, consequential, or incidental damages for breach of this or any other warranty, expressed or implied, whatsoever.

Should at any time within the stated two year period from date of manufacture any appearance of defect in material or workmanship appear, purchaser must notify Howard Industries, Inc. by calling 1-800-956-3456 or (601) 422-0033. Written notice may be mailed to Howard Industries, Inc., Ballast Products Division, PO Box 1590, Laurel, MS 39441 or by fax at (601) 422-1652.

As a condition to qualify for refund of original ballast purchase price or replacement under the provisions of this limited warranty, defective ballasts must be available for return to Howard Industries, Inc. at its request for inspection and test analysis. Prior written approval for return must be obtained from the factory.

Combination T8 Lamp/Ballast System Warranty "Security Plus"

Howard Industries, Inc. – Lighting Products Division warrants lamps installed on Howard electronic ballast to be free from defects in material and workmanship and to operate from the date of installation (or date of manufacture if installation date is not known or available) for the time periods and subject to the terms and conditions specified in the table below. If lamps fail to

operate for the warranty period, Howard Lighting Products will provide a free replacement lamp (no labor allowance). If a Howard electronic ballast fails to operate within the warranty period, Howard Lighting Products will provide a free replacement ballast and labor allowance in accordance with our ballast warranty guide.

Note: Fluorescent lamp warranty periods are based on a 3 hour minimum cycle, unless otherwise noted, with a maximum of 4,000 hours per year. Other operating cycles may affect the warranty period. The Howard lamp warranty can renew when the installation is group relamped. For more details contact Howard Lighting Products.

Terms and Conditions

1. HOWARD Industries warrants the lamps to be free from defects in material and workmanship, and warrants its ballasts as provided in HOWARD's current published ballast warranty, hereby made part of this warranty.
2. Howard lamps and electronic ballast must be installed together as a system. Lamps must be operated on ballasts indicated, within the electrical values noted on HOWARD ballast labels, and with all lamp and lighting equipment instructions and be operated within the normal specified operating range of environmental conditions for the systems. Ballasts and lamps must be installed and operated in accordance with the latest National Electric Code, UL, and ANSI specifications. Ballasts and lamps operated in any system, which has been subjected to abnormal stresses, but not limited to, excess temperatures or under or over voltage conditions are excluded from coverage under this Warranty.
3. The installation must be registered with HOWARD Industries within thirty (30) days from date of completion. HOWARD's combination T8 Lamp/Ballast System Warranty (Security Plus) Registration Form must be completed per instructions and installation acknowledged by HOWARD Industries.
4. Replacement of Howard lamps with lamps from other manufacturers will void the lamp portion of this warranty.
5. Replacement of Howard electronic ballast with any other ballast manufacturer will void the entire warranty.
6. For ballast refer to HOWARD Industries current published ballast warranty. HOWARD Industries will replace in-warranty failures by furnishing lamps in kind.
7. Howard Industries reserves the right to examine all failed ballasts and/or lamps and reserves the right to be the sole judge as to whether any ballasts and/or lamps are defective and covered under this warranty.
8. This Warranty shall be the sole remedy of the Customer and the sole liability of HOWARD Industries to Customer. NO IMPLIED WARRANTY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS MADE OR IS TO BE IMPLIED. HOWARD Industries will not under any circumstances whether as a result of breach of contract, breach of warranty, tort, strict liability or otherwise be liable for consequential, incidental, special or exemplary damages including, but not limited to, loss of profits or revenues, loss of use of ballasts or any other goods or associated equipment or damages to any associated equipment, cost of capital, cost of substitute products, facilities or services, down time costs, or claims of claimant's customers.
9. After contacting Howard Lighting Products and receiving a return authorization number, the user/customer shall promptly return the product at the user/customer's expense to Howard Lighting Products after receiving instructions as to when and where to ship product. Failure to follow this procedure shall void this warranty.
10. Refer to HOWARD Industries Ballast Limited Warranty for other terms and conditions and limitations not otherwise superseded in the foregoing HOWARD Lighting Products Combination T8 Lamp/Ballast System Warranty (Security Plus).
11. Subject to change without notice.

Terms and Conditions of Sales • • • • • • • •

1. General

- a. All orders are subject to acceptance by Howard Industries, Inc. – Lighting Products Division (hereinafter "Howard Lighting").
- b. Specifications are subject to change without notice. Contact Howard Lighting for verification.
- c. Howard Lighting assumes no responsibility for the improper selection, installation, use, and/or maintenance of its products.
- d. The terms and conditions set forth herein are in lieu of any and all other terms and conditions expressed or implied including the warranties of merchantability and fitness for a particular purpose. In no case shall Howard Lighting or Howard Industries, Inc. be obligated or liable for any indirect, consequential, or incidental damages for breach of these or any other terms and conditions expressed or implied whatsoever.

2. Terms

- a. Purchaser understands net is due thirty (30) calendar days from the Howard Lighting invoice date.
- b. Purchaser understands an interest charge of 1.5% per month will be added on any past due balances.

3. Pricing

Unless noted otherwise in writing by Howard Lighting:

- a. All pricing and quotes are based on US dollars.
- b. Pricing is subject to change without notice.
- c. The applicable taxes will be added to invoices.
- d. Written quotes will be honored for thirty (30) calendar days given all fixtures are released for shipment within sixty (60) calendar days from the quote date.
- e. Shipments requested after a quote expires may be subject to a price increase.
 - i. Exceptions may be made when specific ship dates are noted on the original quote.
 - ii. Pricing is subject to change if any accessory, option, or other condition is changed from the original quote.

4. Minimum Billing

Howard Lighting's minimum billing amount is \$100 (US).

5. Freight Allowance

- a. Howard Lighting provides a freight allowance for orders totaling \$1,000 (US) net given the full order is being shipped via normal freight to the same address in any of the contiguous 48 states in the US. Additional freight charges will be added as applicable to shipments to Alaska, Hawaii, and outside the US.
- b. Partial shipments and shipments made to more than one location must each total \$1,000 (US) net to earn a freight allowance. Howard Lighting may make partial shipments at its own discretion, billing each shipment as it is made, but with freight terms applicable to the complete order.
- c. Orders of less than \$1,000 (US) net will be shipped as directed by the purchaser either freight collect or prepaid with the freight charges being added to the invoice.
- d. For air or premium freight requests on orders over \$1,000 (US) net, Howard Lighting will add the air or premium freight charges less the normally-incurred freight charges to the invoice.
- e. Unless noted otherwise in writing by Howard Lighting, all published prices and quotes are F.O.B. factory, Mendenhall, MS or from one of our authorized representatives' facilities.
- f. To qualify for this freight allowance, Howard Lighting reserves

the right to select the shipment's point of origin, method of transportation, and routing.

6. Freight Claims

Purchaser understands and agrees to report claims for damage, shortage, or errors in material as follows:

- a. Claims for damage and/or shortage caused by shipping must be made by the consignee to the shipper within ten (10) calendar days of delivery.
 - i. All items in question must be kept in their original cartons and at the original delivery point for inspection by carrier (upon request).
 - ii. If notified, Howard Lighting will assist purchaser as possible with claim.
- b. Claims involving shortages or errors in material believed to be caused by Howard Lighting will not be considered unless noted on the delivery receipt and reported to Howard Lighting within ten (10) calendar days of delivery.

7. Returned Goods Policy

- a. Howard Lighting will not accept any returned products without prior written authorization from Howard Lighting.
- b. Return request must be made to Howard Lighting within 90 days of original shipment.
- c. Purchaser agrees to prepay all transportation charges on all returned products.
- d. Credit will be issued at the prices in effect at the time of shipment or at the time of the return – whichever is lower – provided the products are in a saleable condition, are current models, and are listed in the published price sheet in effect at the time of the return.
- e. Purchaser understands that all non-stock, special, custom, or modified versions of normal factory-stock items are not returnable.
- f. If Howard Lighting accepts the returned merchandise and credits the purchaser's account, the purchaser agrees to pay a restocking fee of 25% plus the original freight cost. These amounts will be deducted from the credit to cover the cost of handling and inspection.
- g. Howard Lighting will not issue account credits when the value of the items to be returned is less than \$50 (US).
- h. Returns from any one-job order will be limited to no more than 10% of the original job order's value.
- i. Orders for stocked products may be cancelled without any cancellation charges provided Howard Lighting receives a written cancellation request prior to shipment.
- j. Order cancellations for custom products are subject to cancellation charges based on the costs incurred and commitments made by Howard Lighting up to and including the date the written cancellation notification was received.

8. Hold For Release Orders

Orders received as "hold for release" or "will advise" are not processed for manufacture until a written release is received and the order has been priced.

9. Claims

Refunds, repairs, or replacement will be at the sole discretion of Howard Lighting. Reimbursement for any field labor and/or service charges must be pre-approved in writing by Howard Lighting. Refer to our product warranty for more information.
