

**Industrial Grade  
Locking Connector  
NEMA L21-20P**

Model No.: 66601-BK

**Description:** Enerlites's locking devices provide a safe disconnect solution between an equipment load and a power source. These devices incorporate a locking interface that is engaged and disengaged simply by rotating the device assuring a safe and reliable electrical connection.

**Features:**

- Nylon Construction, Visible NEMA Ratings, Nickel Plated Receptacle Strap
- Flammability UL94, V2 Rating
- High Impact-Resistant Chemical-Resistant Nylon
- Reinforced Thermoplastic Polyester
- Ratings and NEMA identification are permanently marked on device.

**Specifications:**

Type.....	Locking devices
Rating.....	20Amp, 120-208Volt
Wiring Scheme.....	4 Pole, 5 Wiring, 3PY, Grounding
Nema Configuration.....	L21-20P
Max Working Voltage.....	208VAC
Termination.....	#14 to #8 AWG Solid Copper Wire.
Contact Blade Material.....	Rivetless Copper Alloy
Standards and Certifications.....	UL Listed

**Testing & Code Compliance**
