

Single-Gang Multimedia Rubber Pass-Through Decorative Adapter

Model No.: 8901

Description: The 8901 is a device designed to pass low voltage cables through a wall. The low voltage cables pass through a flexible rubber material that keeps the cables in place and only exposes a small amount of each cable. This device comes in a standard single gang size and can help maintain organized and professional looking media applications.

Specifications:

- Outer Dimensions: 4.50" Height x 2.75" Width x .37" Depth
- Inner Dimensions (rubber part): 2" Height x .9" Width x .37" Depth
- Standard single gang wall plate size
