| Notes: | | | | | | | | _ Appro | ovals: | | Date: | |
| | | | | | | | | | | 2-3/8" OD Tenon — | | |
| Pole Shaft: Multiple layers of centrifugally wound fiberglass infused with polyester resin topped with extremely durable gelcoat. | | | | | | | | | | lyester | Ø3" (Top OD) | |
| Pole top options : A 2-3/8" aluminum tenon is provided. A removable pole cap or open top are optional. This pole does not accommodate holes drilled on the side wall for the purpose of attaching direct mounting arms. Instead, we offer a large variety of tenon adaptors that will fit over the 2-3/8" tenon to allow any fixture attachment configuration possible. | | | | | | | | | | daptors | | |
| Handhole: An extra-large reinforced handhole is provided for ease of access and installation. Handhole measures 12" X 4" and is located 28" above the ground line. A cover with 2 locking mechanisms and mounting screws are provided. | | | | | | | | | | | | |
| Color: Black or Dark Bronze. Best in class, extra durable finish provides glossy look. | | | | | | | | | | | | 15' |
| A 2"x6" o Edges arc | Embedment : Embedment length is 4 ft. A 2"x6" opening is provided 18" below the ground line for conduit entry. All Sharp Edges around the Bottom of the shaft and around Conduit Entry are covered with Heavy Duty Rubber Trim. | | | | | | | | | | | Pole Height Above Grade |
| Warranty: 10 Years | | | | | | | | | | | | |
| Weight: 50 lbs. | | | | | | | | | | | | |
| Features and Benefits: • Does not rust or corrode. • Much stronger and flexible than steel or aluminum poles. | | | | | | | | | | | 4" | |
